FOR IMMEDIATE RELEASE

**RFI Engineering Appoints Octo-Wireless
Distributor in the USA**

Almere, September 2, 2009

RFI Engineering, a leading manufacturer of smart data solutions for the M2M market, today announced that it has signed a Distribution Agreement with Octo-Wireless, allowing Octo-Wireless to represent and resell the entire portfolio of RFI Engineering. The agreement licenses Octo-Wireless to market the RFI Engineering M2M products and solutions throughout the United States of America.

Octo-Wireless, headquartered in Alexandria (VA), manufactures and sells wireless networking equipment with a solutions-oriented approach driven by the desire to exceed the expectations of its customers in the utilities and telecom markets. The entire portfolio of RFI Engineering advanced cellular products and solutions will be represented and sold by Octo-Wireless under the terms of the Distribution Agreement.

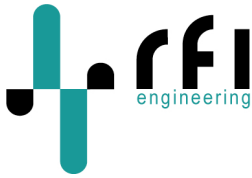

The agreement demonstrates Octo-Wireless commitment to grow in intelligent data solutions for the utilities markets. Octo-Wireless commitment to its customers includes offering a broad wireless product selection, competitive pricing, fast delivery, technical support, consultancy, system integration and sales training.

“We are extremely pleased to partner with a trustworthy and fast expanding company like RFI Engineering,” said Robert Veltman, President and Chief Executive Officer of Octo-Wireless. “As both producer and marketer of advanced smart data solutions, RFI Engineering is uniquely positioned in the M2M market.”

“With this Distribution Agreement in place, RFI Engineering puts another step forward to strengthen its position as the strategic leader in programmable M2M products and solutions,” said Peter Calis, Chief Executive Officer. “This partnership enables RFI Engineering to serve companies in the US.”
